WORLD'S BEST
**PAINT PROTECTION
FILM FOR YOUR PRICELESS
MACHINE**

WITH
**2 YEARS
WARRANTY***

WARRANTY OF THE PPF

We offer a warranty for a period of two years on all the paint protection films that are applied on the body by the certified installers of Carz shield. This is the longest warranty of PPF in India and covers all the major dimensions. The components that are covered in warranty include the condition of film getting yellowish, peeling off, lifting and cracking during the warranty period. However the warranty is void in case of damage due to collision, fire, natural disaster, use of strong solvents (acids & industrial chemicals), case of vehicle modification and the film being tampered with any manner. We also offer complete 'after care' instructions to all our customers that allows them to keep their car shining forever. To find complete information on the PPF warranty, visit our web page on 'warranty' or call Carz shield anytime.

WHAT IS PAINT PROTECTION FILM (PPF)

Every passionate car owner wishes to keep his ride in good shape and shining like new forever. The fact is that even the highest level of care on your part, cannot guarantee the safety against day to day damage that your car suffers in the form of minor scratches and dullness. Incorrect washing techniques, direct sunlight, acid rain, gravels on road, wild bushes, bug splatters etc. can cause prolonged damage to the pristine finish of your vehicle. Ideally there cannot be a perfect safety except if you choose for the new generation 'Paint Protection Film' that Carz shield offers!

Paint protection film or PPF is a thermoplastic clear urethane film that is now used on cars as a preventive measure against any kind of scratches, paint chipping and abrasions of minor type. Originally, it was developed for the military in US to coat the blades of helicopter rotors so as to prevent the abrasion and damage due to flying debris. Gradually it started to be used as a protector film for the cars. PPF is a clear transparent film that attaches itself on the surface and also delivers shine and gloss, which makes it apt for aesthetic enhancement of cars.

WHY CARZ SHIELD?

Carz shield Paint Protection Film is the only way to preserve the showroom quality finish on your vehicle. You will not need to go for the touch up paints or the scratch healing products, which only cover up the scratches and leave unsought marks on the body. PPF is the clear transparent film that guards the entire car body from all sorts of scratches so that you can shed all your fears and enjoy the shine and luster.

We have developed a high quality paint protection film together with the specialty techniques that are followed as protocols while covering the car. Our PPF is optically clear and invisible, very strong, highly durable, urethane film that settles evenly on the car body. This film protects your car from abrasions

and scratches, which get automatically healed when exposed to mild heat. The PPF also prevents chipping and peeling of the car paint for long.

BENEFITS OF CARZ SHIELD PPF:

- **Protection from scratches** – PPF offers protection against minor scratches and general wear and tear like that occurs in day to day use.
- **Self-healing** – Paint protection film is a smart polymer and gets self healed in an hour or two under exposure of mild heat like through car engine or the sunlight or warm water.
- **Fade resistant** – PPF is resistant to fading over time. The film protects the original color for longer time and keeps the car new and shiny.
- **Stain resistant** – This is the specialty of PPF and it resists the action of diversity of milder chemicals that could be present in environment like the bugs and bird acids, acid rain, and colors from various sources.
- **Highly durable** – It is a clear smart urethane film that is very durable and never chips or flakes over time.
- **No Discoloration** – The film itself does not turn yellow like the plastic coats of yester age.
- **Fully maintenance free** – No need for maintenance! Just the simple cleaning and polishing would ensure high luster and shine.
- **Easy Replacement** – The paint protection film can be easily replaced or removed in a day at the workshop that specializes in PPF tasks. There is no damage to the base paint coat during the removal or replacement.

COVERAGE OPTIONS OF PPF

The application areas of paint protection films are bumpers, wing mirrors, door handles, rocker panels, hood, roof, boot and headlamps. The PPF application at these places makes the parts resistant to scratches and hence the car remains shiny forever. The high quality shine and luster that it delivers, make the passionate owners to crave for full covering of the car.

WHAT WE OFFER

Carz shield offers three packages of paint protection film for your car.

- **Level 1** – PPF application on bumpers, wing mirrors and rocker panels.
- **Level 2** – PPF application on complete car excluding roof.
- **Level 3** – PPF application on complete car including roof.

We have developed a world class facility which provides a friendly environment to our elite clients and the working environment is specially made for PPF application.
